

Innovation in Expat Taxation

1

Smart Tax Questionnaire

Clients should be able to access questionnaires from anywhere & anytime. **Convenience** ✓

Only ask what's relevant, don't confuse clients with unnecessary questions. **Relevancy** ✓

Each year should be easier, don't ask for standard information again if nothing has changed. **Efficient** ✓

Software Automation

Consultants should not be spending time moving data from questionnaires to internal software and forms.

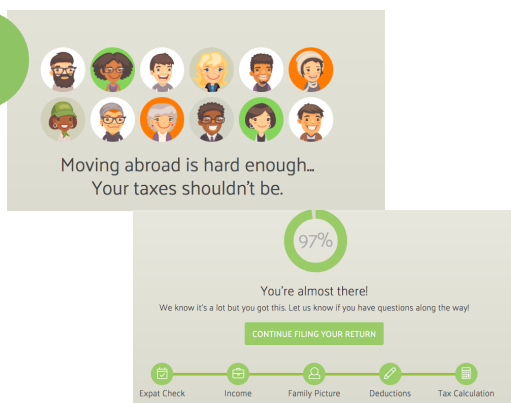

Why?

- Reduce Human Error ✓
- Increase Efficiency & Output ✓
- Decrease Operating Costs ✓

2

3

Fun Experience for Clients

Tax and a fun experience normally don't belong in the same sentence, but it should. Innovation should include **personalizing** and even **gamifying** the client experience.

MyExpatTaxes' user-friendly tax software enables expats to prepare U.S. tax returns in as little as 30 minutes.
